

2005 RESEARCH COMPETITION

STATISTICAL INFORMATION

The objectives of CPSI's inaugural Research Competition are to support patient safety research and demonstration projects that:

- Involve interdisciplinary and/or multi-jurisdictional teams of researchers and healthcare administrators. Ideally, direct care providers, patients, and personal caregivers will be engaged in the project;
- Demonstrate potential for improvements in patient safety;
- Are readily applied to other healthcare services, settings or jurisdictions across Canada; and,
- Have a strong emphasis on knowledge transfer, beyond publication in peer-reviewed journals and presentations at scientific conferences.

Geographical Distribution

Financial Summary

- Projects eligible for funding requested between \$9,300 to \$100,000 from CPSI. The average amount requested was approximately \$67,000.
- The projects will be co-sponsored by numerous organizations across Canada, with co-sponsors contributing \$2.4M to the 28 projects.

2005 RESEARCH COMPETITION

Healthcare Settings Distribution

Acute Care	18
Home Care and Community Care	5
Emergency medical services (paramedic)	1
Long-Term Care	4

Areas of Research Distribution

Communications	3
Clinical / Technology	11
Incidence / Prevalence / Surveillance	8
Education / Simulation	6
